

Hi! My name is Justin and I'm 8 years old. I used to have autism.

Five years ago, I couldn't even talk! I used to go to OT, speech therapy and ABA for more than 20 hours every week!

If it weren't for all this therapy, I wouldn't be here talking today – actually, I probably wouldn't even be talking at all!

It's not fair! Why should kids with broken bones, diabetes and cancer get insurance coverage but kids with autism don't?

I hope that children with autism will soon be able to get the help they need.

Thank you for your support!
